Furniture and Cabinet Components: drawer sides, backs and bottoms—lumber, plywood, MDF/HDF—raw, prefinished, printed, painted, paper-laminated; tops, drawer fronts, end panels, doors and face frames—lumber, plywood, MDF/HDF—raw, paper, melamine, and HPL-laminated, printed, painted, RTF, powder-coated, prefinished; table bases and occasional tables—HPL and veneered; bedposts, bed rails, and bun feet

Hardwood Lumber & Dimension: moulder blanks, edge-glued panels, stiles and rails, doors and drawer fronts

Moulding and Millwork Products: MDF, pine, fir, hardwood—raw, primed, paper-wrapped, veneer-wrapped, prefinished

We create added value for our customers, increasing your efficiency and bottom-line profitability through our extensive list of products and services. As an innovative solutions provider, we supply whatever our customers need, when they need it to get the job done right. From raw materials to semi- and fully finished component parts, no other company does more for their customers than we do.

The SEEMAC Advantage for Customers

Worldwide Resources. A comprehensive network of worldwide resources and strategic alliances with value-added suppliers.

Superior Products. Qualified mills, ensuring quality with onsite visits and QA audits.

Qualified Sources. Select service partners, including laminators, fabricators, painters, finishers, component parts producers, and warehouse and logistics providers.

Solutions Provider. We meet with your key employees to understand the challenges you face and help develop solutions to get the right products to your door.

Customer/Vendor Compatibility. No other company has the vast resources or experience to pick the vendor who is the best match for your particular product and application needs.

Competitive Pricing. Our financial strength and the scale of our purchases allow us to negotiate mill-direct pricing, plus offer a host of other perks, including our service, expertise and credit advantages.

Supply Chain Management. We coordinate handling ocean freight; container shipping and stripping; rail, truck and intermodal shipments; reloading; warehousing; and delivery.

Virtual Warehousing. We don't own any of our inventory sites—instead using public warehouses to keep our costs extremely low. We're able to move into and out of facilities very quickly, and adjust inventories up and down as our customers' needs change.

Inventory Management. Our robust computer software and customer forecast system allows us to keep just the right amount of inventory available to help improve your cash flow and reduce financial risk.

Financial Strength. We know our customers need capital to invest in plants, equipment, finished goods and product marketing. SEEMAC has the cash/credit available to purchase products from suppliers and pay them quickly, the warehouses to hold products until you need them and the ability to invoice you only as you use the products. These capabilities—and our financial strength—support and ensure that your money is not tied up unnecessarily.

Single Resource. A one-stop shop. SEEMAC's broad range of products and services reduces the number of suppliers you need.

Outstanding Service. Our team is committed to providing the products you need, when you need them—on time, on budget. SEEMAC offers incredible perks—from mill-direct pricing to value-add capabilities, from financial strength to problem-solving solutions.

We know what products work. We scour the globe to find them. And we deliver them to your door … that's the SEEMAC advantage.

SEEMAC

Global Resources. Innovative Solutions. Passionate Service.
